

Yummy

v2

“Absorb what is Useful
Discard what is Not
Add what is your Own”

- Bruce Lee

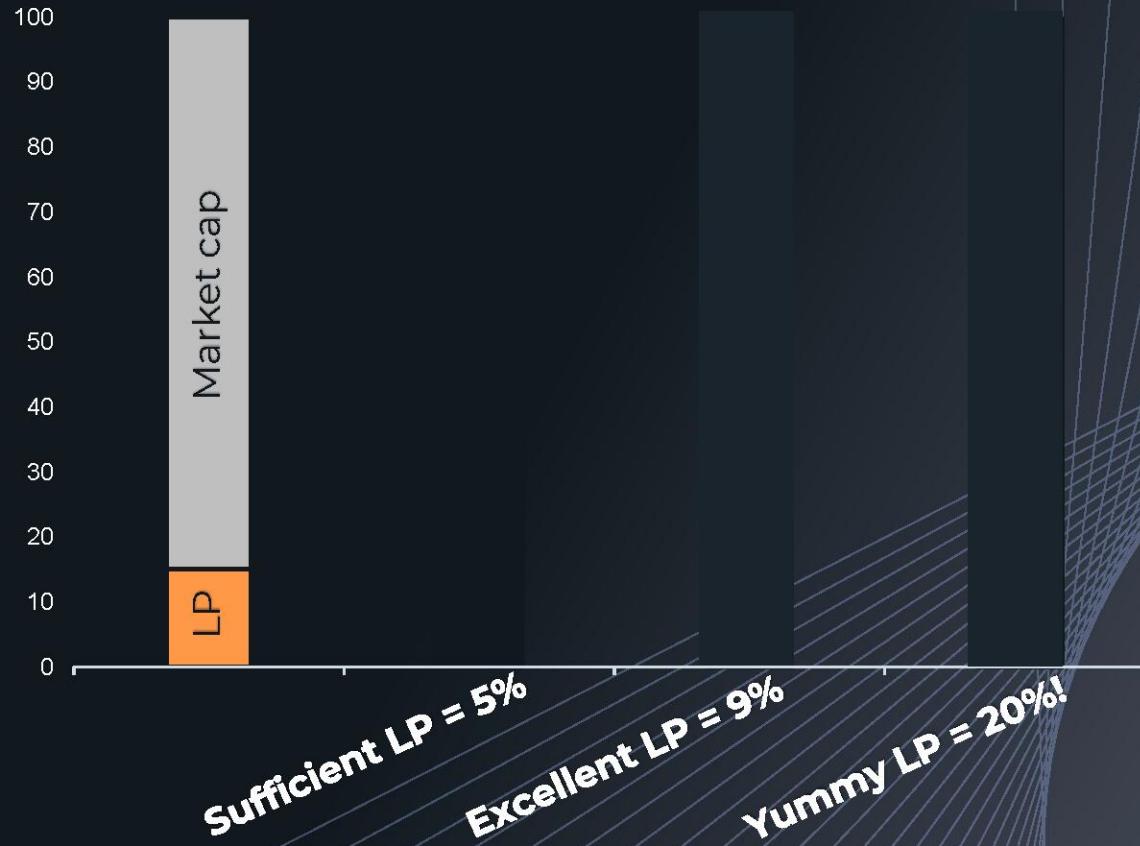

1.

Why Yummy V2?

“The Liquidity is too damn high!”

Why is this a problem?

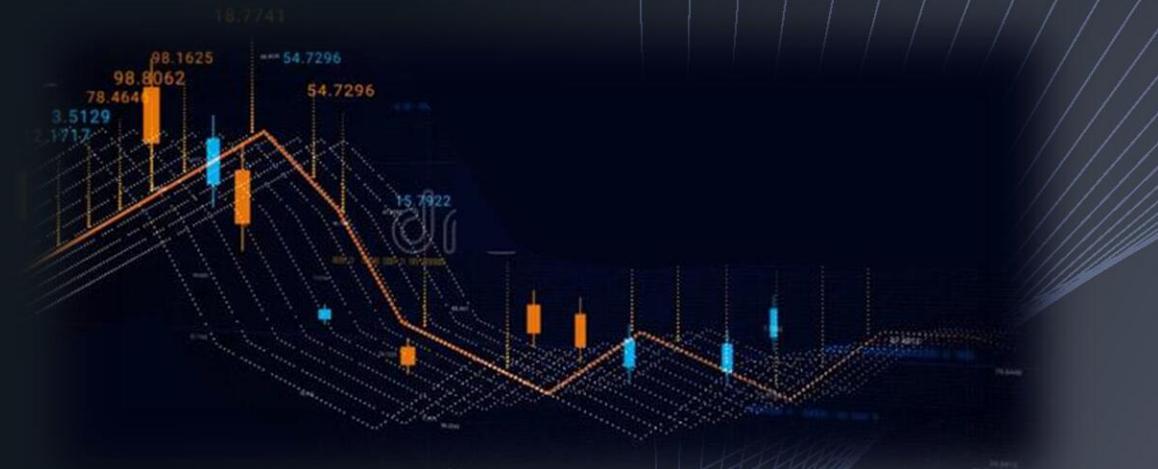

- 1) Higher LP makes it harder to move the price (both ways).**
- 2) High LP protects you during negative sentiment but also makes it harder to capitalize on positive announcements**
- 3) Reducing LP now makes sense as Yummy marketcap is at a low level and we no longer have any low cost whales**

We need additional **burning** mechanisms

1) Current burns requires high Yummy volume and price action

2) Works great in bull markets but not so much in downturns

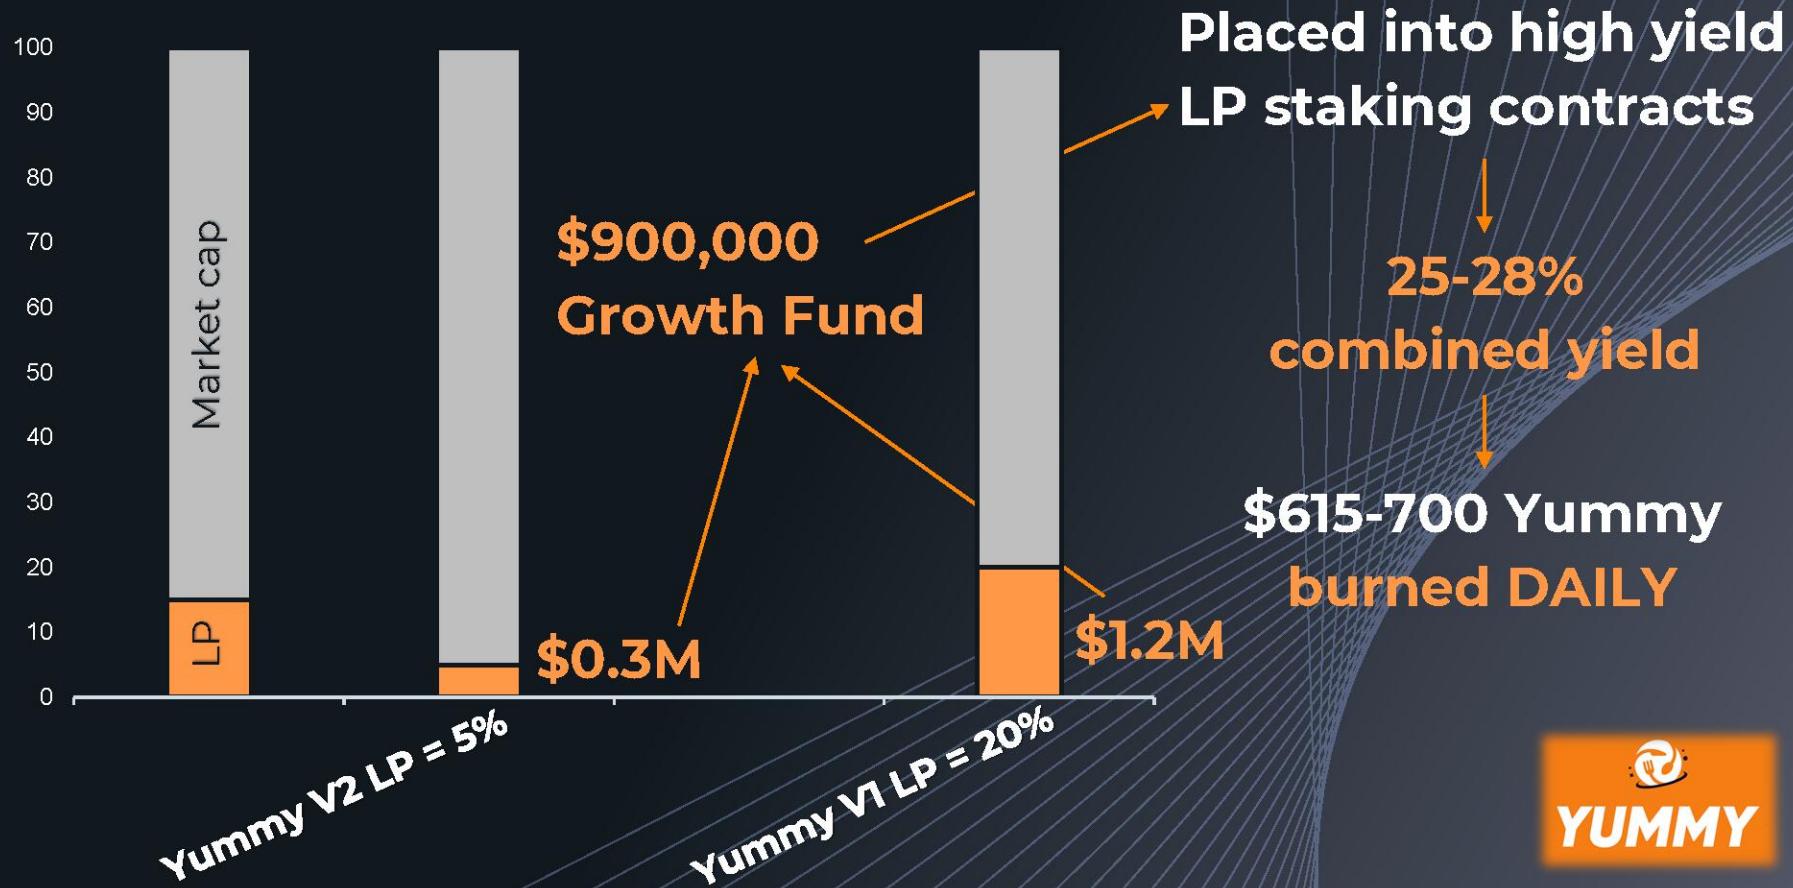

To solve this problem we will use the proceeds from the V2 conversion to create:

Yummy Growth Fund

Convert LP into a Yield Yield Fund

YUMMY

The Wallet Trigger Problem

- 1) The V1 contract accumulates Yummy and once it hits 3B it sells the tokens on open market. That's how the dev wallet gets funded**
- 2) This poses a few problems:**
 - a) Causes a red candle that we cannot prevent**
 - b) Volume slows down as people are waiting for the trigger to buy the dip**
- 3) V2 contract will not sell at specific intervals. Yummy will accumulate in the contract and can be sold, burned or just allowed to sit there with no fixed schedule**

2.

How do we convert?

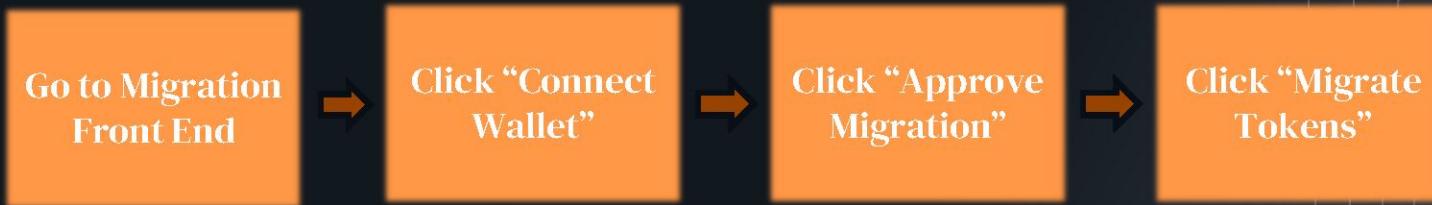

Converting to V2

- 1) Since our Liquidity is locked, we cannot simply airdrop V2 tokens to existing holders**
- 2) V1 holders will have to send their tokens to a contract address**
- 3) Any V1 holder who misses the initial conversion window will have **5 months** to convert his/her tokens**

Converting to V2

Step 1) Conversion Process

Migration URL will be pinned on Telegram chat and Twitter. Once the migration process is done (this will be EXTENSIVELY advertised on Telegram chat and Twitter) you can then claim the V2 tokens and start trading immediately)

Step 2) Claiming Process

Yummy V2 tokens
are transferred to
your wallet

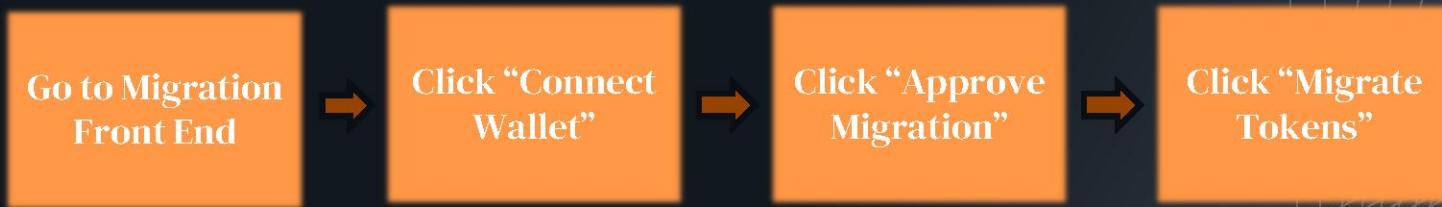

YUMMY

What if I miss the initial conversion?

Yummy Holders will have **5 months to convert to V2**

Claiming during Grace Period

Your V1 tokens will be transferred out of your wallet and you will receive the V2 tokens within 24 hours to the same address

Note: You will only receive V2 tokens equal to the amount of V1 that you held at the time of the conversion. This is to prevent people from buying cheap post-conversion V1 and exchange it for V2.

YUMMY

Conversion Bonus!

To encourage a smooth conversion process, we are giving away bonus Yummy tokens for first movers!

*Bonus tokens will be transferred 4-5 days after V2 trading starts

3.

Potential Scenarios

What if few people convert V2?

Then the holders who do convert will benefit greatly

Assume that only 200 billion Yummy (20% of total) converts to V2 even after the grace period

What if few people convert V2?

In the previous scenario we end up with \$600k fund for a \$2M market cap or 30% cash to Mcap ratio. Now let's see with 300B

YUMMY

What if few people convert V2?

So now we end up with \$650k fund for \$3M marketcap or 21.6% which is obviously not as good as 30%

The less people convert, the better the ratio of Growth Fund to Market Cap in V2. More Fund per MCap means more burn % per MCap

4.

The Funding Round

Ratio of Fund size to Market Cap

To ensure long term sustainability, you want the Growth Fund-to-Market Cap ratio to be as HIGH as possible.

We already saw how 200B conversion gives us a 30% ratio, 300B a 21% conversion and so on

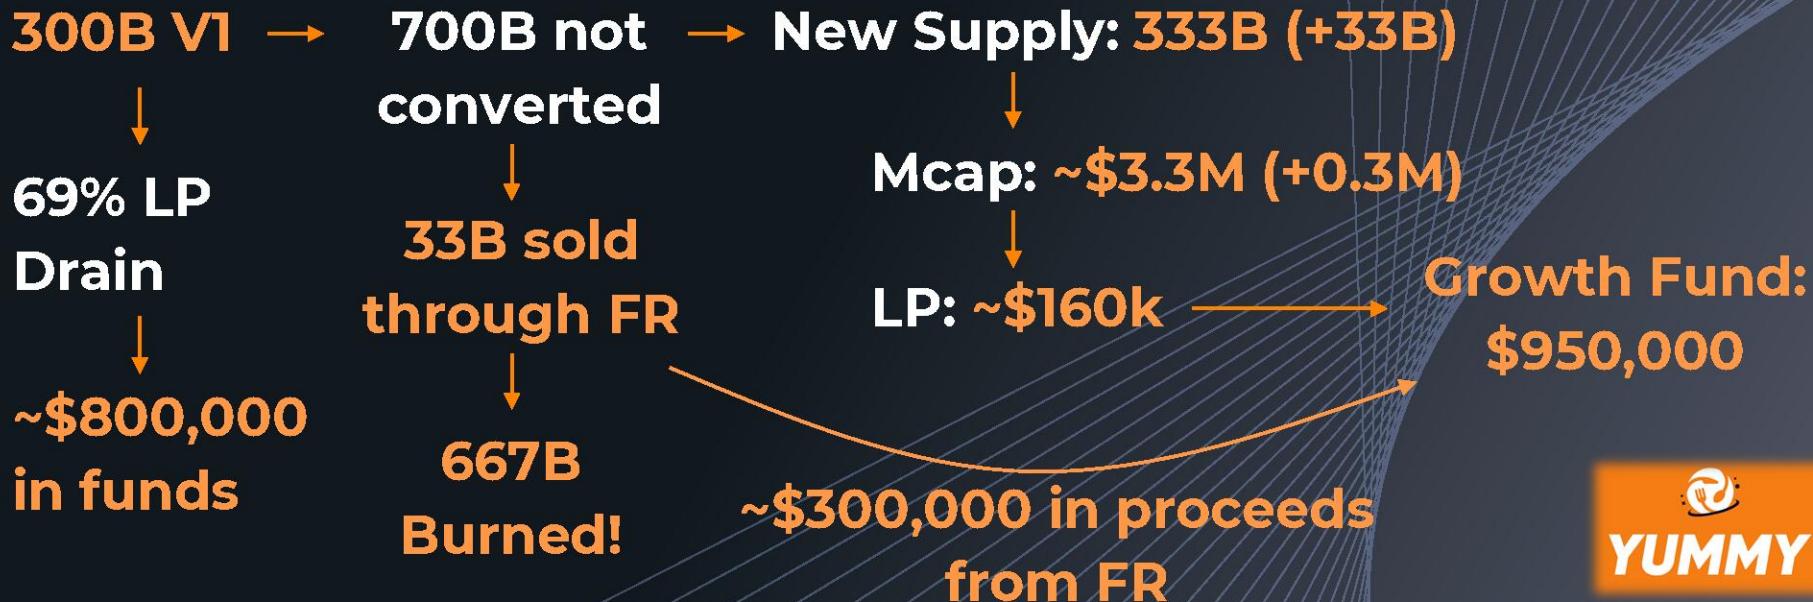

Funding Round is unique in the sense that any Yummy bought through it goes 100% to the Fund so it's a 1:1 ratio to build it up

A total of \$300,000 in Yummy V2 is available through the round

Example of Funding Round Impact

Let's bring back the scenario of 300B converted and assume we managed to sell \$300k of V2 through the funding round

YUMMY

Ratio of Fund size to Market Cap

Through a Funding Round of just \$300,000 we managed to increase the Growth Fund by almost 50% while Market Cap has only increased 10%!

- 1) Anyone wishing to acquire \$25k or more Yummy V2 through the FR can DM one of the admins on Telegram
- 2) Price will be market average but without paying the additional 9% purchase tax
- 3) If buying before V2 trading starts, you get your V2 tokens as soon as trading is enabled. If buying after, you get your V2 tokens immediately

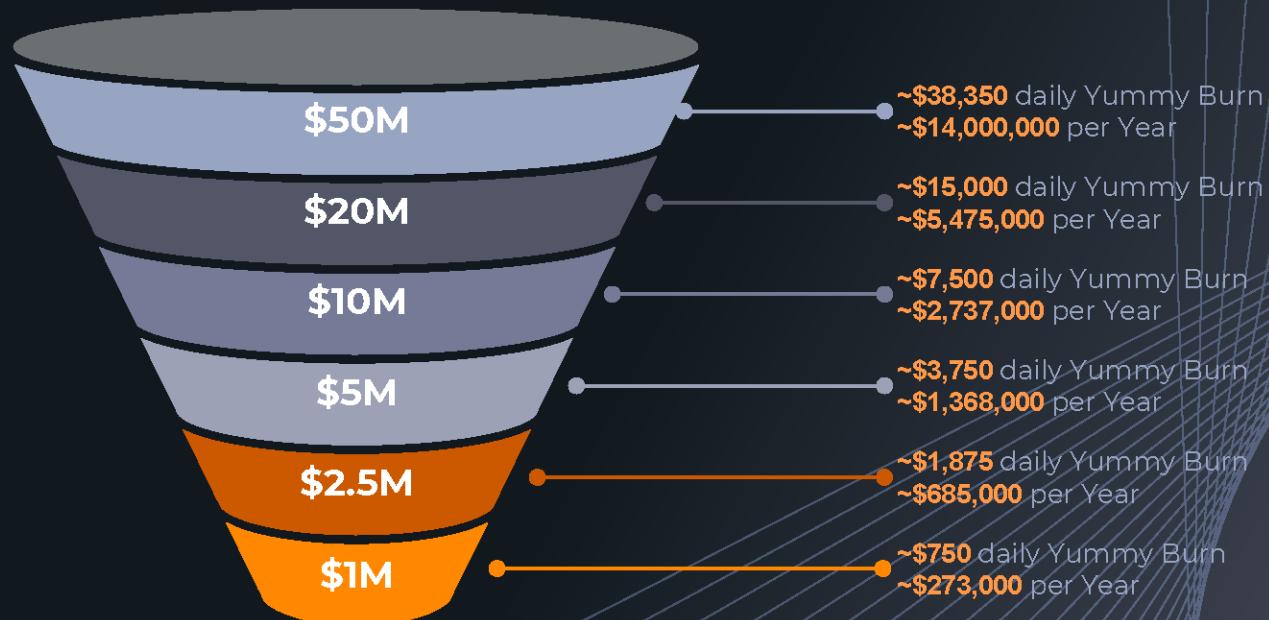

6.

What does the Future hold after V2?

V2 Roadmap

How Impactful is the Growth Fund?

*Estimate Only.

Performance not Guaranteed

5.

Frequently Asked Questions

Is there a 9% tax to convert to V2?

No. You will receive your total wallet amount when you swap the tokens.

What is the potential size for the Growth Fund?

Very, very high. It will start around \$800k but it will quickly swell into the Millions as Tax is allocated towards it. Here are some examples of the farms we plan to use up until \$25,000,000 growth fund size

	BUSD-BNB	29.55%
	FARMING BUSD-BNB	APR 32.41% 
	FARMING CAKE-BUSD	APR 43.52% 
	FARMING USDT-BNB	APR 35.5% 

Apeswap

	CAKE-BNB CAFE LP	\$143,955 TVL	42.12% 
			APR

Cafeswap

Pancake

Validator	Voting Power / %	APR
Legend III	703.082.17858092 / 4.52%	20.24%
fuji	708.273.34793306 / 4.55%	18.89%
stake2me	651.784.31272743 / 4.19%	13.97%

Binance
Chain Staking

... and many
more

With low liquidity in Yummy V2 can the price drop more if someone sells a large position?

Yes. But that is unlikely since all sizable Yummy wallets have a cost of acquisition far higher than current price. Any whale dumping V2 at these prices is losing a very substantial amount of money. Also, as mentioned before, Low Liquidity makes it much easier to move the price up as well.

If I don't do the initial conversion to V2 and I am a Yummy V1 holder, how do I get my tokens afterwards?

Yummy V1 holders will have 5 months to convert to V2 through a very simple web interface.

Note: Only rely on Links provided on the Yummy Official Telegram or Twitter account

What are the new tokenomics for V2? Do we still have 9% tax?

Yes. Tax is still 9% for buys and sells. Usage of the funds will be as following and will be adjusted according to market conditions

3% reflects to Holders

3-6% towards Growth Fund and/or Yummy Burns

0-1% towards LP build

0-1% towards Charity

During bull markets, GF and LP build will be prioritized

During bear markets, Yummy burns will be the priority

When can we expect the return of Yummy Merchandise?

Glad you asked! We are planning a major Merch release with our V2 Migration. Check out the new designs!

A screenshot of a website interface for YUMMY merchandise. At the top, there's a navigation bar with social media links for Twitter (@yummcrypto), Instagram (@yummcharity), and Telegram (@yummycoin). Below that is the YUMMY logo and the website address www.yummcrypto.com. The main content area features three categories of products: T-SHIRTS, HOODIES, and ACCESSORIES. Each category has a representative image and a "Shop now" button. Under T-SHIRTS, there's a white t-shirt with the YUMMY logo. Under HOODIES, there's a pink hoodie with the YUMMY logo. Under ACCESSORIES, there's a black baseball cap with the YUMMY logo.

Will V2 contract be renounced?

Not initially but we have plans to use EverOwn to give ownership to the community at a later stage. You can find more details on EverOwn in the EverRise website.

What will be the opening price of V2?

The price will be the same as V1 before the conversion was initiated. But since V2 will have lower liquidity, the price is bound to move a lot more aggressively than V1

What happens at the end of the grace period for conversion?

Any tokens left in the Unclaimed wallet after the 5 month grace period will be burned. This is expected to reduce supply MASSIVELY as it could be as much as 20-30% of entire circulation

What are the future marketing plans after V2?

Yummy has always forged high level partnerships and will continue to do so. The difference now is that the exposure from those deals will actually be enough to move the price.

For example, when our NIL deals were announced we saw over \$80,000 in purchases, yet due to exceptional liquidity our price moved only 4%. With V2 that move would have been over 25%

HOT DAMN, LET'S GO MAN!! I'M PUMPED! WHEN V2?!

We are aiming to convert on or about:

**SATURDAY
SEPTEMBER 18TH**
